

Bernzott U.S. Small Cap Value Fund BSCVX

Summary Prospectus

October 2, 2019, as amended October 17, 2019

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and Statement of Additional Information ("SAI") and other information about the Fund online at <http://www.bcafunds.com/resources.html>. You may also obtain this information at no cost by calling 1-877-998-9880 or by sending an e-mail request to info@bernzott.com. The Fund's Prospectus and SAI, both dated October 1, 2019 (as each may be further amended or supplemented), are incorporated by reference into this Summary Prospectus.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund, if you hold your shares directly with the Fund, or from your financial intermediary, such as a broker-dealer or bank, if you hold your shares through a financial intermediary. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold your shares directly with the Fund, you may elect to receive shareholder reports and other communications from the Fund electronically by contacting the Fund at 1-877-998-9880 or, if you hold your shares through a financial intermediary, contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. If you hold your shares directly with the Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by contacting the Fund at 1-877-998-9880 or, if you hold your shares through a financial intermediary, by contacting your financial intermediary.

Investment Objective

The investment objective of the Bernzott U.S. Small Cap Value Fund (the "Fund") is long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	
Redemption fee if redeemed within 30 days of purchase (as a percentage of amount redeemed)	2.00%
Wire fee	\$20
Overnight check delivery fee	\$25
Retirement account fees (annual maintenance fee)	\$15
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management fees	0.80%
Distribution (Rule 12b-1) fees	None
Other expenses	0.36%
Total annual fund operating expenses	1.16%
Fees waived and/or expenses reimbursed ¹	(0.21%)
Total annual fund operating expenses after waiving fees and/or reimbursing expenses ¹	0.95%

¹ The Fund’s advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, acquired fund fees and expenses (as determined in accordance with Form N-1A), expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 0.95% of the average daily net assets of the Fund. This agreement is in effect until September 30, 2020, and it may be terminated before that date only by the Trust’s Board of Trustees. The Fund’s advisor is permitted to seek reimbursement from the Fund for a period ending three full fiscal years after the date of the waiver or payment. This reimbursement may be requested from the Fund if the reimbursement will not cause the Fund’s annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of reimbursement.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The example reflects the Fund’s contractual fee waiver and/or expense reimbursement only for the term of the contractual fee waiver and/or expense reimbursement.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year	Three Years	Five Years	Ten Years
\$97	\$348	\$618	\$1,390

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 44% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its net assets (including amounts borrowed for investment purposes) in common stock of small capitalization companies that are organized in the United States and the securities of which are principally traded on a major U.S. exchange. The Fund’s advisor focuses on companies that it believes to be undervalued and underappreciated by the general market. The Fund considers small capitalization companies to be those companies that, at the time of initial purchase, have a market capitalization no greater than that of the largest company in the Russell 2000 Value Index during the most recent 12-month period (approximately \$7.8 billion during the 12-month period ended June 30, 2019). The Russell 2000 Value Index is reconstituted annually. Because small capitalization companies are defined by reference to an index, the range of market capitalization of companies in which the Fund invests may vary with market conditions. Investments in companies that move above or below the capitalization range may continue to be held by the Fund in the sole discretion of the Fund’s advisor. The Fund will generally hold between 25 and 35 positions. In addition, the Fund may invest in exchange-traded funds (“ETFs”), which are pooled investment vehicles that generally seek to track the performance of specific indices and are traded on exchanges.

Principal Risks of Investing

Risk is inherent in all investing and you could lose money by investing in the Fund. A summary description of certain principal risks of investing in the Fund is set forth below in alphabetical order. Before you decide whether to invest in

the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective.

Cybersecurity Risk. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Advisor, and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder's ability to exchange or redeem Fund shares may be affected.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

ETF Risk. Investing in an ETF will provide the Fund with exposure to the securities comprising the index on which the ETF is based and will expose the Fund to risks similar to those of investing directly in those securities. Shares of ETFs typically trade on securities exchanges and may, at times, trade at a premium or discount to their net asset values. In addition, an ETF may not replicate exactly the performance of the benchmark index it seeks to track for a number of reasons, including transaction costs incurred by the ETF, the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or the number of securities held. Investing in ETFs, which are investment companies, involves duplication of advisory fees and certain other expenses. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs.

Focused Investment Risk. Although the Fund is diversified, the Fund's advisor focuses its investments in the securities of a relatively small number of issuers. Many financial experts may take the position that investing a portfolio in a limited number of issuers results in greater market risk and potential losses than if the portfolio's assets were diversified among the securities of a greater number of issuers.

Management and Strategy Risk. The value of your investment depends on the judgment of the Fund's advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. Due to the Fund's investment strategies, during periods of high market returns the Fund's investment returns may trail those of the Russell 2000 Value Index, the Fund's benchmark index.

Market Risk. The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

Sector Focus Risk. The Fund may invest a larger portion of its assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors. For example, as of May 31, 2019, 37.2% of the Fund's assets were invested in the technology sector. Technology companies, especially small-cap technology companies, may involve greater risk because their revenue and earnings tend to be less predictable and their shares prices tend to be more volatile. Certain technology companies may have limited product lines, markets or financial resources, they may depend on a limited management group, and/or their products and services may not be economically successful or may quickly become outdated.

Small-Cap Company Risk. The securities of small-capitalization companies may be subject to more abrupt or erratic market movements and may have lower trading volumes or more erratic trading than securities of larger, more established companies or market averages in general. In addition, such companies typically are more likely to be adversely affected than large capitalization companies by changes in earning results, business prospects, investor expectations or poor economic or market conditions.

Value-Oriented Investment Strategies Risk. Value stocks are those that are believed to be undervalued in comparison to their peers due to adverse business developments or other factors. Value investing is subject to

the risk that the market will not recognize a security's inherent value for a long time or at all, or that a stock judged to be undervalued may actually be appropriately priced or overvalued. In addition, during some periods (which may be extensive) value stocks generally may be out of favor in the markets.

Performance

The bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the average annual total returns of the Fund compare with the average annual total returns of a broad-based market index. Updated performance information is available at the Fund's website, www.bcafund.com, or by calling the Fund at 1-877-998-9880. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future.

Calendar-Year Total Return (before taxes)

For each calendar year at NAV

The year-to-date return as of June 30, 2019 was 15.22%.

Highest Calendar Quarter Return at NAV	10.90%	Quarter Ended 09/30/2018
Lowest Calendar Quarter Return at NAV	(20.39)%	Quarter Ended 12/31/2018

Average Annual Total Returns for Period Ended December 31, 2018	One Year	Five Years	Since Inception (September 11, 2012)
Return Before Taxes	(6.20)%	5.83%	10.09%
Return After Taxes on Distributions*	(10.03)%	3.74%	8.23%
Return After Taxes on Distributions and Sale of Fund Shares*	(0.74)%	4.32%	7.81%
Russell 2000 Value Index (reflects no deduction for fees, expenses or taxes)	(12.86)%	3.61%	8.29%

* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor

Bernzott Capital Advisors (the "Advisor" or "Bernzott")

Portfolio Managers

The portfolio management team is comprised of Kevin Bernzott, Chairman and Chief Executive Officer, Scott T. Larson, CFA, Chief Investment Officer, and Thomas A. Derse, CFA, President. The portfolio managers have been jointly and primarily responsible for the day-to-day management of the Fund's portfolio since its inception in June 2012. Ryan Ross, CFA, Analyst, has been a co-portfolio manager and jointly and primarily responsible for the day-to-day management of the Fund's portfolio since May 2017.

Purchase and Sale of Fund Shares

To purchase shares of the Fund, you must invest at least the minimum amount.

Minimum Investments	To Open Your Account	To Add to Your Account
Direct Regular Accounts	\$25,000	\$5,000
Direct Retirement Accounts	\$10,000	\$1,000
Automatic Investment Plan	\$10,000	\$500
Gift Account For Minors	\$10,000	\$1,000

Fund shares are redeemable on any business day the New York Stock Exchange (the "NYSE") is open for business, by written request or by telephone.

Tax Information

The Fund's distributions are generally taxable, and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
